

Herpes Simplex Virus Type 1 (HSV-1) VP21/VP22a (scaffold) monoclonal antibody LP13

Hybridoma cell line producing LP13 antibodies raised against Herpes Simplex Virus Type-1 VP21/VP22a scaffold protein, which are mouse monoclonal antibodies of the IgG2a isotype. Works well for immunofluorescence (IF) on fixed specimens and for immunoprecipitation (IP) on triton solubilised samples. Can be used to detect protein by western blot.
